## **DETAILED ACTION**

### ***Priority***

Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d). The certified copy has been filed in parent Application No. 09/958,901, filed on January 22, 2002.

### ***Specification***

The disclosure is objected to because of the following informalities: on page 5 the specification sets forth a liner A11" and a pipe A11" which are believed to be separate items in the figures when the specification goes on to recited liner A10" and A11" which is also incorrect when there is believed to be only one liner. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting

directly or indirectly from an international application filed before November 29, 2000.

Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claim 19 is rejected under 35 U.S.C. 102(e) as being anticipated by Cruickshank. The patent to Cruickshank discloses the recited apparatus for lining a pipe comprising a liner 12, means for deploying the liner into the pipe 14, 16, a messenger pig 28, and a line attached between the messenger pig and the liner for pulling the liner through the pipe.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 20 is rejected under 35 U.S.C. 103(a) as being unpatentable over Cruickshank in view of Storah. The patent to Cruickshank discloses all of the recited structure with the exception of forming liner by extrusion and die drawing, however, it is believed that the liner in Cruickshank is extruded when no seams are shown or disclosed and such is an old and well known method of forming liners as seen in the prior art cited below. The patent to Storah discloses an apparatus for drawing a liner 20 is drawn through dies 18 and 19 by means of a cable 26 which is considered to be die drawing of a liner to reduce the diameter of the liner before pulling into the pipe it is to line. It would have been obvious to one skilled in the art to provide the apparatus in

Art Unit: 3752

Cruickshank with a drawing die to allow the liner to be pulled through a die to reduce its diameter for easier installing of the liner in a pipe as suggested by Storah, where the liner in Cruickshank is already believed to be an extruded liner. Such would allow for the easier installation of the liner especially when being pulled by a pig through the pipe to be lined.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Harper, Brittain, Maine, Steketee, Jr., Connor, and Ploeg (GB 2,381,057) disclosing state of the art pipe lining apparatus and methods.
